DETAILED ACTION

Status of the Application

Acknowledgement is made of the receipt of the IDS filed 05/20/02, the IDS filed 06/07/02 and the Amendment filed 06/05/02.

Upon thorough review and consideration, the previous Office Action filed 02/12/02 has been withdrawn. The following are the new grounds of rejection:

Claims 1-24 are pending. Claims 1-24 are rejected. Claim 4 has been amended.

Claim Objections

Claim 4 is objected to because of the following informalities: The term "polyurathane" contains a typographical error and should be correctly written as "polyureuthane." Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1615

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shukuzaki et al. (US Pat. No. 5, 266,321); (collectively, "Shukuzaki").

Shukuzaki teach an oily make-up cosmetic comprising a silicone gel composition, which comprises a partially crosslinked organopolysiloxane polymeric compound and a low viscosity silicone oil (see reference column 2); (col.7); (col.8, lines 47-56); and examples. Specific examples of the low viscosity oils are: dimethylpolysiloxane, methylphenylpolysiloxane, octamethylcyclotetrasiloxane, decamethylcyclopentasiloxane and the like (col. 7, lines 3-16). Various cosmetic powders, such as mica can be included in the composition (col. 7, lines 32-45). The make-up cosmetic can be applied to a foundation, eye shadow, face powder, lip stick and the like and can take various forms including a solid, stick and the like (col. 8, lines 53-56). Therefore, it would have been obvious to one of ordinary skill in the pharmaceutical art to formulate a make-up cosmetic composition comprising a dispersion of a silicone gel composition, prepared by encompassing a low viscosity silicone oil into the structure of a crosslinked organopolysiloxane polymeric compound and a cosmetic powder into an oil base

Art Unit: 1615

because it could help improve the previous drawbacks of excess stickiness or oiliness. The expected result would be an improved, stable cosmetic composition, which is less sticky, provides a fresh, smooth feeling to the skin and offers superior make-up effects.

Regarding the instantly claimed cosmetic form, i.e., mascara, it is the position of the examiner that the cosmetic composition of Shukuzaki meets the applicants' claimed limitation of a mascara since the reference of Shukuzaki reads on any make-up cosmetic solid, stick or the like.

Prior Art made of record and deemed relevant by the Examiner:

US Pat. No. 5, 412,004 Tachibana *et al.* 02/1994
